Easy breezy, low-cost, classroom management, teaching and online safety platform for schools

Forget edtech fatigue... we’re all about simple yet essential teaching tools to monitor and instruct in classrooms and with remote learners.

That’s why teachers choose classroom.cloud. Its cloud-based teaching tools help deliver engaging and meaningful learning experiences for students in a safe online environment.
Key features

- **Connect** to students’ devices quickly and easily by a range of methods to get started with teaching and learning straight away.

- **Broadcast** your screen and audio to connected students to help show/talk them through explanations and lesson activities.

- **Interact** with students in real time via chat and messaging tools, answer help requests, gain instant feedback on topic understanding with class surveys, remote control their screen, and more!

- **Monitor** students’ screens, see what they’re typing and who they’re collaborating with - plus, view their web and application use in real time to ensure they’re on task.

- **Gain attention** by locking students’ screens, blocking webcam use and controlling sound levels from the student’s device, for maximum focus while you explain the lesson activity.

- **Stay focused** with ‘allowed’ and ‘restricted’ website/application lists and control USB usage to ensure students can only access relevant and appropriate material during class.

- **NEW: Stay safe** at all times with the new online safety toolkit, helping to keep your online environment protected by monitoring concerning activity, identifying students at risk and spotting online safety trends.

- **Use with** your already-established Microsoft SDS, ClassLink or Google Classroom platforms for maximum flexibility and to save time when setting up your technology-led lessons.

- **Multi-platform support** for use with a mix of devices ensures your school is future-proofed and can simply roll with the ever-changing tech landscape.

- **Learning continuity** is ensured, whether in school or remotely, with one set of clear, consistent tools.

- **Scalable** from the smallest school to the largest District!

- **Low cost**, low maintenance and cloud-based - win, win, win!
Keeping your students safe online

The online safety toolkit (optional component) helps to keep your online environment protected by monitoring concerning activity, identifying students at risk and spotting trends across multiple languages.

Keyword and phrase monitoring: Powered by over 14,000 phrases in multiple languages, schools can monitor the online safety words that students are typing (even in Microsoft Teams and Outlook).

Updating keywords: Add your own keywords to the online safety database that are relevant to your school and community – and even share them across your District!

Keyword cloud: When a keyword or phrase is triggered, it populates a word cloud. This is a nice easy way to spot trending topics.

Contextual intelligence-based Risk Index: The context of a triggered event is analysed (the device used, time of day, websites visited, applications used, history of alerts) and a risk index number is generated, helping staff to determine its severity.

Student ‘Report a concern’ (Coming soon): Students can report their concerns by sending a message, screenshots or documents in confidence to a trusted member of staff.

Online resources: Students have instant access to a range of online support resources – covering topics such as FGM, drug addiction, grooming and bullying. Staff can also manage the pre-populated list and add any additional terms they feel are appropriate.

Security: With its easy-to-use access permissions and reports that can be applied or changed as needed, schools can ensure only authorized staff have access to the most sensitive information. Images or screenshots can also be blurred to ensure maximum sensitivity.

“classroom.cloud will be a significant benefit to protecting students!”
