One platform. Three essential toolkits!

Classroom Management, Safeguarding and IT Management

Schools like yours trust **classroom.cloud** to help create a safe and productive learning environment. Built on evidence, impact and pedagogical approaches, our 3-in-1 award-winning solution integrates seamlessly with your school's already-established Microsoft SDS, ClassLink, or Google Classroom platforms.

And the best bits...

- No minimum spend or implementation fees
- No bots - real people behind every chat, phone call and email
- Free online training and support
- Affordable fixed pricing.

Transform your classroom

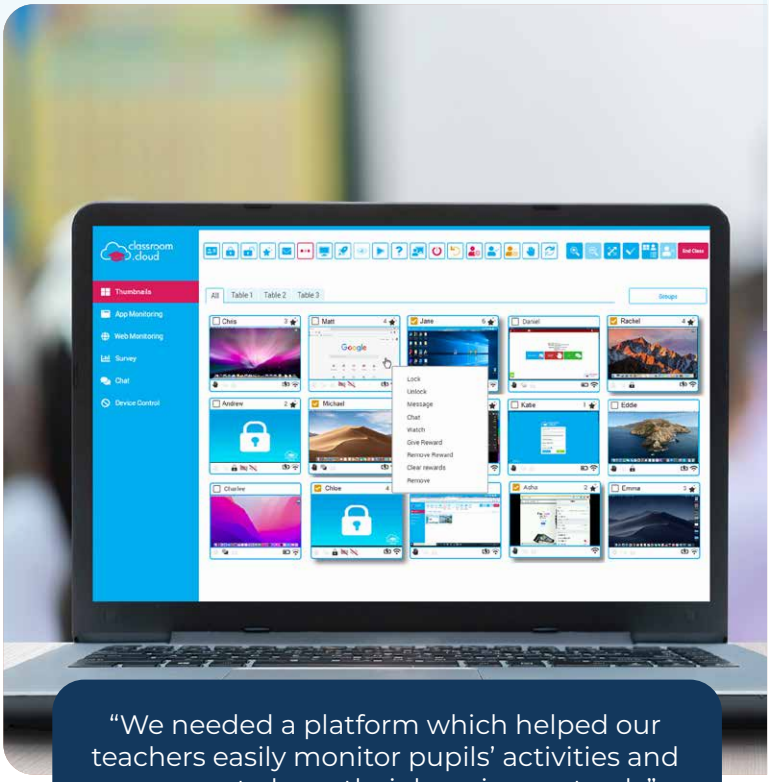
classroom.cloud's classroom management and instructional tools make it a smooth and enjoyable user experience every time.

Start lessons quickly and maximise lesson time

- Power off, Restart or Log class devices in/out
- Reset students' passwords without IT support
- Deliver support quickly via the help request tool
- Add lesson details to the Student Toolbar for students to access.

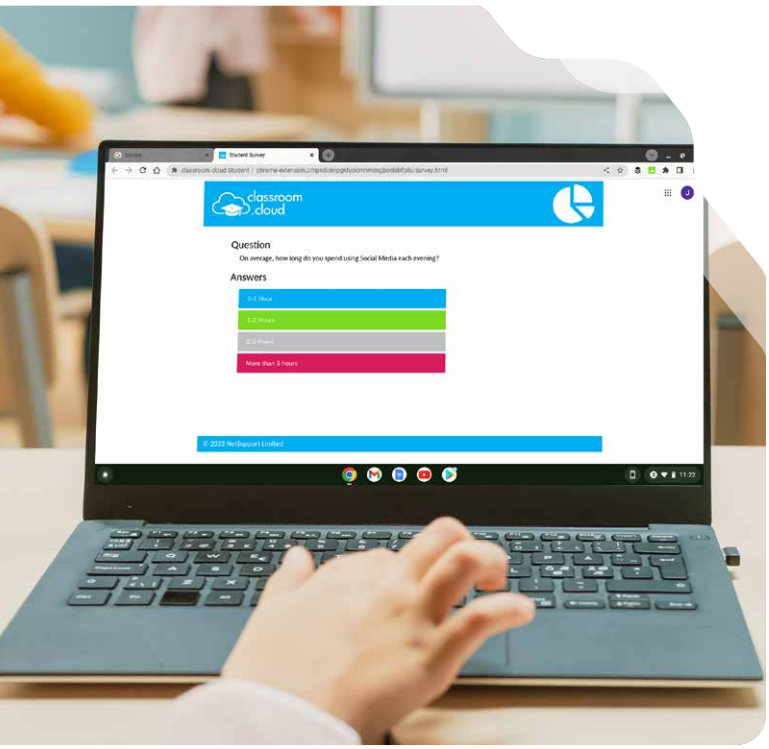
Engaging instruction for active learning

- Share your screen and audio to help show/talk students through lesson activities
- Launch websites and apps directly onto students' devices
- Collaborate with chat and messaging tools.



"We needed a platform which helped our teachers easily monitor pupils' activities and progress to keep their learning on track."

Bury Grammar School



Keep students on task and focused

- Monitor students' screens
- Control website and application usage
- Lock students' screens, mice and keyboards
- Control the use of USBs/webcam/audio during class
- Remote control students' screens

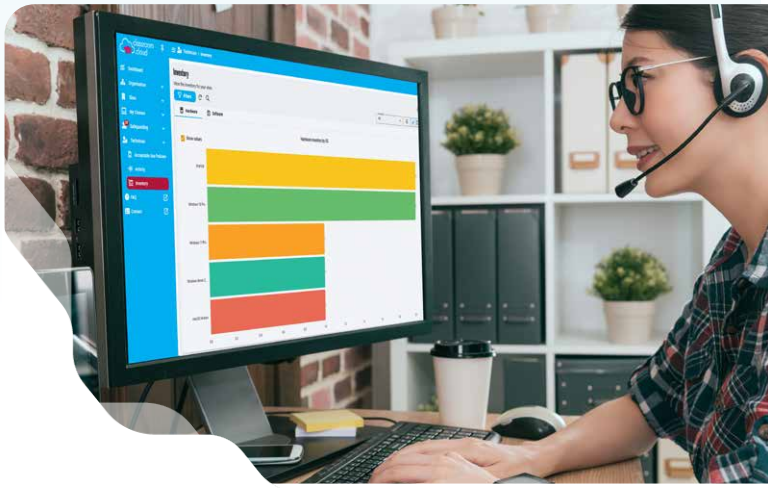
Check progress and celebrate work

- Use surveys to gamify assessment
- Keep students on their toes by using the 'Random Select' mode
- Reward students with stars to celebrate achievements.

Manage and maximise EdTech

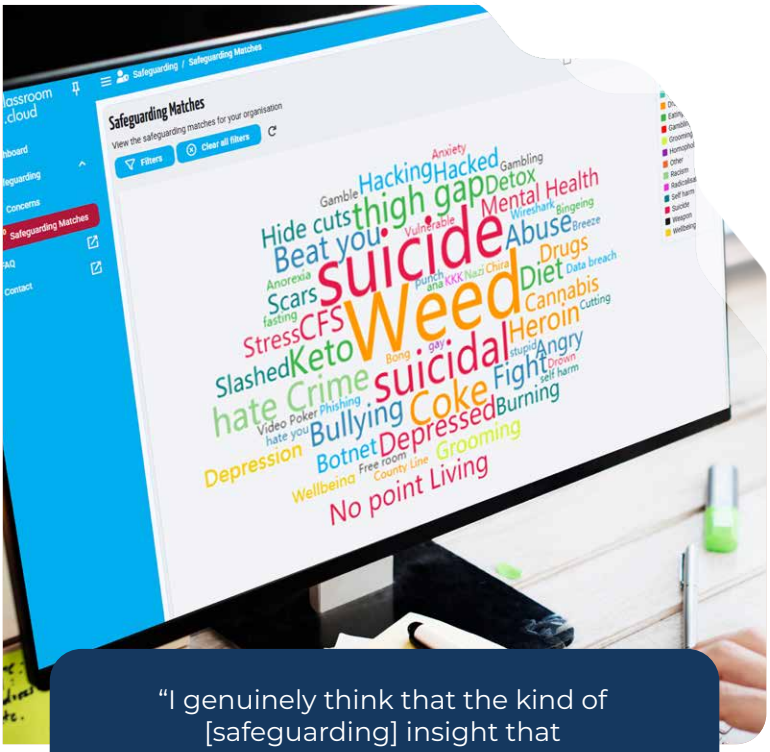
Deployed in minutes, **classroom.cloud**'s IT management toolkit helps schools/MATs to manage teacher and student devices centrally, as well as see at a glance how school technology is being used and how to maximise it – saving time and money!

- Tech Console
- Hardware and software inventory
- Remote control
- Reset users' passwords
- Set school-wide internet/application restrictions
- Run a remote PowerShell script
- Power on/off, Restart or Log off devices with Power Management, and automate with schedules
- Send and track AUPs.



Ensure nothing slips through the net

The optional **safeguarding** toolkit enables selected staff to monitor online activity, identify students at risk and spot concerning trends. Plus, **classroom.cloud** your school operate in line with the latest official guidance and requirements.



"I genuinely think that the kind of [safeguarding] insight that classroom.cloud can provide to a school means it should be in every one!"

Beat The Cyberbully

Monitor concerning activity

- Keyword and phrase monitoring, powered by over 20,000 phrases in multiple languages, enables you to monitor the safeguarding words that students are typing (even in Microsoft Teams).
- AI monitoring - monitor and view triggers captured from Copilot and other AI platforms.
- overnight filter - check for overnight activity on students' school devices.
- The context of a triggered event is analysed (the device used, time of day, websites visited, applications used, history of alerts) and a risk index number is generated, helping staff to determine its severity.
- Use Safeguarding Groups to deliver focused monitoring of, for example, specific year groups or students considered vulnerable.

Spot trending topics

- When a keyword or phrase is triggered from something a student has typed, copied or searched for, it populates a word cloud. This is a nice easy way to spot trending topics. Click on any word in the cloud to see a full explanation and who triggered it.

Keeping track of events

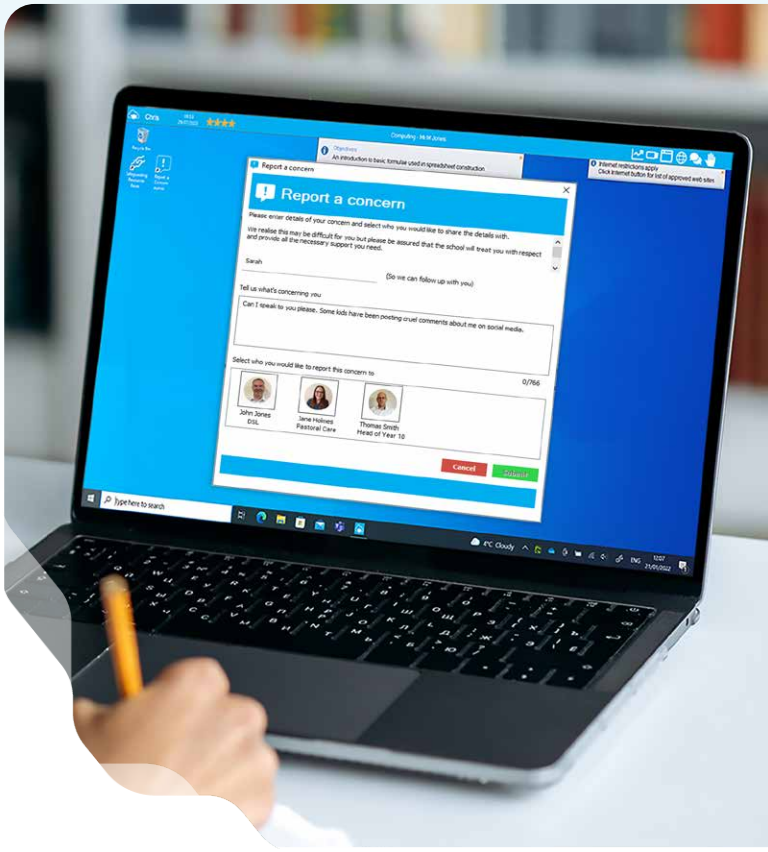
- Create and send custom (daily/weekly/monthly) phrase match and student concern reports to nominated staff.
- Power BI reporting
- Integrate with your MYCONCERN and CPOMS accounts, so nothing gets missed.

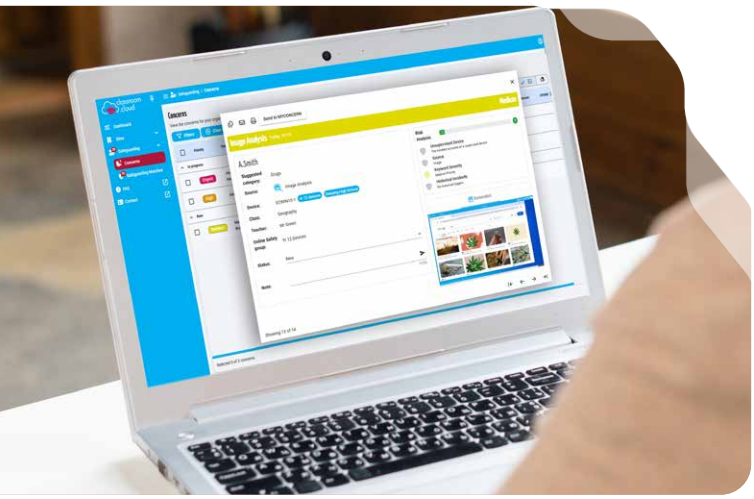
Empower students

- Students can report their concerns by sending a message in confidence to a trusted member of staff.
- Students have instant access to a range of online support resources – covering topics such as FGM, drug addiction, grooming and bullying.

Safeguarding security

With easy-to-use access permissions, image/screenshot blurring for confidentiality, and safeguarding views to ensure staff only have access to the data they need, security and confidentiality are maintained.





Enhanced Safeguarding (optional)

The Image Analysis feature detects images displayed in websites, apps and media, alerting staff when harmful content may have been viewed by a student.

Assisted Monitoring

We've partnered with SWGfL who can monitor safeguarding alerts within your classroom.cloud account, helping to assess and prioritise concerns so your team can respond swiftly and effectively.

"Frankly, your software/interface is so incredibly well thought out and simple, the setup and deployment was not hard at all!"
